

WARNING SIGNS*:

Testicular Cancer

- Swelling of one or both testicles
- Heavy feeling in scrotum
- Discomfort and/or aching pain in groin or lower abdomen
- Change in shape, size, consistency or tenderness in one or both testicles
- Hard, painless pea-size lump on either testicle that does not move with the skin
- Tenderness and/or enlarged chest (around the nipples)

If you notice any of the above signs, see your health care provider immediately and get it checked out!
